

Cameron LNG employees with Community Advisory Committee

Engaging our Stakeholders

As part of our core value to do the right thing and our commitment to the communities in which we operate, we strive to educate and engage local project stakeholders about Cameron LNG. These stakeholders include our neighbors, elected officials, community and business leaders, environmental agencies, employees, and their families who work and live in these communities. For nearly 20 years, Cameron LNG has had a long-standing history of engaging these local stakeholders early in the process and has a strong track record of developing, building, and operating our projects with support from these groups.

Our Stakeholder Engagement Plan:

The Stakeholder Engagement Plan (SEP) gives Cameron LNG a systematic approach to ensure expectations, decisions and issues are effectively tracked, managed and resolved with a defined structure for local stakeholders to express issues or concerns that may arise.

The Plan's Purpose:

- **Educate** and broaden the knowledge base on topics related to Cameron LNG and U.S. natural gas exports
- **Demonstrate** compatibility of the liquefaction terminal with the surrounding environment and communicate safety attributes
- **Provide** a feedback and response mechanism for the public using multiple communication channels
- **Evaluate** opportunities to partner with local charitable organizations to support initiatives to improve the community.

A key component of our SEP is the Community Advisory Committee (CAC). Established in 2005, the CAC continues to serve as the "eyes and ears" of the company - providing local guidance, insights, and suggestions. Today the CAC is comprised of 10 community leaders from Cameron and Calcasieu parishes and meets quarterly to provide feedback on ways to improve service and community involvement.

Another way we seek input is our Community Feedback Mechanism protocol, which includes a community hotline number available on Cameron LNG's website for the public to inquire about our operations or report potential concerns.

Additionally, CLNG has a dedicated community email address and social media channels, which serve as other mechanisms for community input.

Our goal through stakeholder engagement is to listen, learn and find new ways for continuous improvement.
