

Community Impact Report 2025

OUR COMMITMENT

Cameron LNG's story begins and ends with the people of Southwest Louisiana. While we connect the region to global energy markets, our roots and our commitment are right here at home.

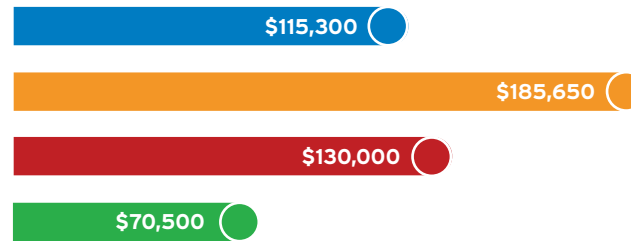

For more than 20 years, we have supported the schools, nonprofits and community organizations that make this region thrive. Since 2002, we have invested approximately \$4.9 million in local initiatives, driven by our belief that strong communities are the foundation of everything we do.

OUR GIVING PRIORITY AREAS

In 2025, we expanded our support across Cameron and Calcasieu parishes. Here are the areas where we focused our efforts:

- Economic Development
- Education and STEM
- Emergency Preparedness, Safe and Healthy Communities
- Environmental Stewardship

COMMUNITY INVESTMENT BY PRIORITY AREAS

2025 HIGHLIGHTS

In 2025, Cameron LNG achieved a major milestone, exporting its **1,000th LNG cargo**, while continuing to prioritize the community that supports our success. Even as we focused on safe, reliable operations, employees and partners remained engaged in local traditions and events, from the **Hackberry Summer Splash** and **Holiday Festival** to a new **Season of Giving Community BBQ**. Our team supported STEM education through **Chem Expo**, reaching more than 2,000 students and hosted Cameron Parish high school seniors at the **Technology Center** to begin the **Cameron LNG scholarship** application process. Together, these efforts reflect a year of global achievement and strong local connection.

2025 COMMUNITY PARTNERSHIP HIGHLIGHTS

ECONOMIC DEVELOPMENT

Cameron LNG is committed to supporting a strong and diverse local economy. We invest in initiatives that create lasting economic growth and opportunity across the region. By partnering with local businesses and community organizations, we strengthen economic activity in underserved areas and help people gain the skills they need to succeed. Through workforce training, small business support and community partnerships, we are helping build a more resilient Southwest Louisiana.

The Southwest Louisiana Economic Development Alliance

We support the Southwest Louisiana Economic Development Alliance, an annual partnership that advances the SWLA on the Move regional initiative. The program connects businesses with local, state and federal leaders to strengthen relationships, encourage collaboration and promote economic growth across Southwest Louisiana.

EDUCATION | STEM

Cameron LNG invests in STEM education to help prepare students for careers in science, technology, engineering and math. In addition to financial support for local programs, our employees volunteer in classrooms, mentor students and share real-world experience. We also provide scholarships for Cameron Parish students and support college students enrolled in engineering and technical programs.

Hackberry High School Welding Program

To support the welding program at Hackberry High School, Cameron LNG provided a certified welder and maintenance employees from our workforce to assist in the classroom throughout the fall semester. These employees stepped in while the school's instructor completed certifications, reflecting our commitment to the community and our focus on preparing students for technical careers.

ENVIRONMENTAL STEWARDSHIP

Protecting the region's natural environment is an important part of how we operate. Cameron LNG partners with local organizations to support wetland restoration, habitat enhancement and environmental education. We also invest in community beautification and cleanup efforts that help preserve the natural beauty of Southwest Louisiana for future generations.

Cameron Parish Beach Sweep

Cameron LNG employees joined volunteers from our partner companies Mitsubishi Corporation, Mitsui & Co., Ltd., Semptra Infrastructure and TotalEnergies for the annual Cameron Parish Beach Sweep, the region's largest coastal cleanup held during International Coastal Cleanup

Day. Together, volunteers removed litter along five miles of shoreline, helping protect wildlife and preserve coastal habitats.

EMERGENCY PREPAREDNESS, SAFE AND HEALTHY COMMUNITIES

Helping to keep our communities safe is central to our operational culture. Cameron LNG works alongside first responders, law enforcement, healthcare organizations and emergency managers to support preparedness and response efforts across the region. Our investments in training, health services and food assistance programs help strengthen resilience and protect the quality of life of our neighbors.

Cameron Parish Office of Homeland Security and Emergency Preparedness (OHSEP)

Cameron LNG supported the Cameron Parish OHSEP with a donation to strengthen local emergency response capabilities. The funding supports upgrades to office and mobile command communications, including satellite technology, software improvements and weather stations, helping ensure the parish is equipped to respond quickly and safely during emergencies.
